

To achieve the innovative look of GTS-1, pieces of freshly quarried slate are cut into geometric shapes and precision gauged to achieve a uniform thickness of three-eighths of an inch (3/8"). The geometric pieces are then tumbled in sand to enhance the natural look. The standard, uniform thickness cuts labor costs and installation time for architects, contractors and designers.

GTS-1 tumbled slate endures extreme weather conditions, adsorbs very little moisture and resists fading, making the ideal material for exterior walkways, patios, terraces and landscaping accents.

When used for interior flooring, GTS-1 exhibits the same durable toughness and resistance while providing a luxurious look and feel. "Very few products equal slate for natural beauty and elegance," says Dr. Richard J. Hoder, president of International Slate & Stone. "Our enhanced products, including GTS-1 expand the possibilities for creative, decorative use, both inside and outside any building."

GTS-1 is available attractively assembled on a plastic mesh backing in arrangements of three inch (3") to six inch (6") pieces of slate. All pieces are gauged to a uniform thickness of three-eighths of an inch (3/8"). Mat

sizes are sixteen inches by sixteen inches (16" x 16") and packed five to a box. Color choices are a lush Muted Green and Ebony.

Minimum Orders

International Slate & Stone is now offering value-savings with minimum orders as low as four crates for our complete line of slate roofing, flooring and landscape tiles. Please calculate your slate needs to the full load. For example, a full crate of Slate contains 360 square feet. If you need 1,500

square feet, please order five crates. Sorry, we cannot accept orders for partial crates.

To order, or for more information, contact us today at 1-810-919-1285 or visit the web site at www.internationalslateandstone.com.
